Plant_Orig	Native

Oriental Mangrove	<i>Bruguiera gymnorrhiza</i> (L.) Lam.	F-Rhizophoraceae
<i>Bruguiera gymnorrhiza</i> is an evergreen large size tree up to 35 m. The bark is smooth and radish brown in colour. The leaves are elliptic and shiny, flowers are white or cream colour petals. Calyx is pink to reddish brown in colour. The fruits are turbinate when matured drop and embedded in the mud and develop root rapidly. The key use of the tree is for wood production. Agroforestry, coastal protection, windbreak, wild life food and bee forage.
