Suicide Tree	<i>Cerbera odollam</i>, Gaerth.	F- Apocynaceae
<i>Cerbera odollam</i> is a medium size evergreen tree species belongs to the Apocynaceae Family. Commonly known as suicidal tree or pong-pong. The bark is dark brown in colour, leaves are elliptic and glossy. The flowers are white colour just like ‘Gulichi” with white yellow throats. The fruits are spherical/ round shape and shiny. The fruits contain extremely poisonous seeds. When seed exposure to air the white kernel turn violet then grey and ultimately black. Cerberin the poisonous compound finds in the kernel of <i>cerbera odollam</i>.
