Tulip Mangrove

Heritiera littoralis. Aiton,

F- Malvaceae

Heritiera littoralis , commonly known as looking glass mangrove or tulip mangrove, native to coastal area of Australia, Asia and Africa. It is an evergreen tree growing up to 25 to 28 m. with prominent buttress root. Flowers are greenish pink to dull purple colour. The fruit is a flattened woody pod and contains single seed. The common name refers to the silvery appearance of the underside of the leaf resembling as a mirror. It is widely harvested for timber purposes like ship building, bridge, furniture, and household.
