

S_No_	127
Vernacular	पीला बांस
Scientific	Bambusa vulgaris var.
Family	Poaceae
Remarks_	सुनहरे रंग का सजावटी (Golden colored ornamental)
Latitude	23.3567
Longitude	85.2441
Plant_Orig	Exotic

Yellow Bamboo	<i>Bambusa vulgaris</i> ‘vittata’(Schrad. Ex J.C. Wendd)	F- Poaceae
<i>Bambusa vulgaris</i> has lemon-yellow culms with green stripes and dark green leaves. Culms grow up to 10-20 m high and 4-10 cm thick. Culms are barely straight or flexure (bent alternately in different direction) drooping at the tips. The internodes length is 20-45 cm long. Flowering is not common. So, availability of seeds are difficult. Mostly propagated through vegetative propagation like culm or branch cutting.
