Scientific	Bambusa vulgaris (Black)
Family	Poaceae
Remarks_	बाड़ और सजावटी उपयोग (Fencing and ornamental use)
Latitude	23.3568
Longitude	85.2441
Plant_Orig	Exotic

Black Bamboo	<i>Bambusa vulgaris</i>, Black(Schrad. Ex J.C. Wendd)	F- Poaceae
<i>Bambusa vulgaris</i> has dark black culms with green stripes and dark green leaves. Culms grow up to 10-20 m high and 4-10 cm thick. It is widely planted for ornamental purpose; green stripe appears within internode. The internodes length is 20-45 cm long. Flowering is not common. So, availability of seeds are very difficult. Mostly propagated through vegetative propagation like culm or branch cutting. Locally known as krishna bans in west Bengal.
