Budha Belly Bans	<i>Bambusa vulgaris</i> ‘ wamin’	F-Poaceae
<i>Bambusa wamin</i> is commonly known as Giant Budha Belly. A very attractive ornamental species due to swollen internodes and weeping culms. Average height up to5-7 m and diameters is 1-12 cm. Its culms are popular for bamboo craft or ornamental pieces. Currently it is very popular in big society flats or Road dividers plantation. It is easily planted through cuttings.
