Plant_Orig	Native

Hathi Bans	<i>Dendrocalamus giganteus</i> Munro	F-Poaceae
<i>Dendrocalamus giganteus</i> commonly known as giant bamboo or locally called Hanthi bans. One of the longest bamboo species in the world. It is very tall and large-clumed, greyish green bamboo. Average heigh of the species is 30 m but some time reaches up to 40 m under favourable conditions. It can grow up to 40 cm per day. Branching only at top. Arial roots occur up to the 6-8 node. Sheaths are average up to 24-30 cm and width is 40-60 cm. The upper surface of the sheath is covered with hairs. The under surface is glossy and not hairy. Mostly used in construction and weaving. The young shoots are edible.
