Capitatum ***Cephalostachyum capitatum* (Munro) R.B. Majumdar** **F- Poaceae**

Cephalostachyum capitatum is a perennial evergreen, clump forming bamboo. The average height and clump diameter are 5-10 m, and 25-30 mm respectively. Distributed in India, Myanmar, and Bangladesh. The culms are used for construction work and for making bows and arrows. Seeds are eaten in time of scarcity easily propagated through seeds and cuttings.
