Cylon Iron Wood

Messua ferrea L.

F-Calophylliaceae

Large evergreen tree with brown bark large flaky peeling irregularly. Leaves are opposite elliptic with entire margin. Flowers are white with four petals organized in centre. The young leaves are red to yellowish pink and drooping turned green when matured. Fruit is an ovoid globosely capsule with 1-2 seeds. Timber is very hard and strong with high density. It's used for making furniture, railway sleepers. vehicles boat, agriculture instruments, etc. Flowers are used for cosmetics and seeds are edible and yield oils. Buddhist worship this tree because they believe the Buddha will attain enlightenment under this tree. Propagated through seeds.
