Kulu

***Sterculia urens* Roxb.**

F- Malvaceae

Sterculia urens is a small to medium size deciduous tree with a pale colour trunk. It is commonly known as Kulu, Gum Karaya, Katira, Kateera gum and Ghost tree. The bark of this tree is smooth and surface layer peeling off in long flakes. Leaves are five palmate lobes and cluster at the tips. The flowers are yellowish green produced in panicles in the axil of the leaves. The fruits are initially green in colour turned pink to red when ripe. Each fruit contain six seeds. A natural gum know as gum karaya is exuded by the trunk when bark is damaged. Its gum is used as a medicine, the colour of gum is whitish. The seeds are eaten after roasted. Frequently found in natural forest of Jharkhand.
