

S_No_	148
Vernacular	गरिपिष्प (Gliricidia)
Scientific	Gliricidia sepium
Family	Fabaceae
Remarks_	नाइट्रोजन स्थरि करने वाले पौधे (Nitrogen Fixing plant)
Latitude	23.3548
Longitude	85.244
Plant_Orig	

Jirhul	<i>Gliricidia sepium</i> (Jacq.) Walp.	F-FAbaceae
Medium size deciduous tree with multibranch commonly known as Mother of Cocoa, Madre de Cacao and Jarul, the bark is smooth, whitish grey to pink colour. Flowers grow on the tip of the branches in light pink colour. Pods are usually green turned yellow when ripe. Single pod produces 4-10 round brown seeds. Widely planted for fencing, fodder, green manure, intercropping etc. Flowers are edible.
