Betel Nuts

Areca catechu L.

F-Arecaceae

Areca catechu is a species of palm mostly grows in Asia and Africa. The plants are straight and annual rings are easily observed on the trunk. The spadix is the flower form of this species. The male and female flower bear on the same spadix. In India its mostly cultivated in south India. It is Commonly known as Areen palm, Areca nut palm, Betel palm and catechu. This palm is commonly known as betel palm because fruits of this tree is often used with the betel leaf along with another masala like sauf, long, elaichi and katha (extracted from *Acacia catechu*). Mangala, Sumangala, Mohitnagar and srimangala are famous varieties of India.
