Remarks_	फलियाँ कान जैसी दखिती है (Pods resemble human ears)
Latitude	23.3576
Longitude	85.2443
Plant_Orig	Exotic

Earpod wattle

Acacia auriculiformis A. Cunn.ex Benth.

F-Mimosaceae

Acacia auriculiformis. commonly known as Auri, Karuvel, and Akashmani in different state. Evergreen tree with dark brown fissured bark. Leaves are modified leaf stalks (called phyllodes), which are flattened and enlarged. The true leaves binately compound are only visible on seedling state. Bright colour yellow spiker of tiny flowers found in cluster. Pods are coiled initially green later become woody with brown colour having 6-8 black colour seed in single pod. Wood is good for making paper and light furniture. Widely planted as an ornamental tree.
