Bay Leaf

Cinnamomum tamala (Buch.-Ham)T. Nees & Eberm.

F- Lauraceae

It is a large size evergreen tree native to India. Commonly known as ‘ Indian Bay Leaf’. Leaves are simple sub-opposite, ovate in shape with entire margin, acute base, and apex. Pale yellow flowers grow in apical portion of the twigs. Bark is brown rough with vertical cracks. Widely planted for its aromatic leaves. Due to aromatic properties of leaves used in perfumery and mouth freshener. All part of the plants are used as a medicinal purposes. It is one of the important spices in Indian recipe. Easily planted through seeds or air layering.
