Phalsa

Grewia asiatica L.

F-Malvaceae

Grewia asiatica commonly known as phalsa is a small tree growing up to 6-8 m. Its leaves are rounded with dented margin. The flowers are produced in cymes of several together. The colour of the flower is yellow. Its fruits is an edible drupe initially green turned purple to black when ripe. It is extensively cultivated for its sweet and sour fruit. The root is used by tribes for rheumatism. Its bark is used for making ropes.
