Whistling Palm

Casuarina equisetifolia L.

F-Casuarianaceae

Casuarina equisetifolia is commonly known as whistling tree Ironwood, beach casuarina etc. It is medium size monoecious tree with furrowed bark on old tree. Needle shape leaves appear in drooping branchlets. The leave reduced to scale like teeth. Male and female flowers produced in same tree. The fruits are an oval woody shape, yellowish brown. Widely planted as ornamental purpose and leaves are useful as absorbent material for the removal of textile dyes. Wood is useful for many purposes.
