Kurz</b> | <b>F-Anacardiaceae</b> |
| <p>Wild Mango is a deciduous tree, 10-15 m tall, with yellowish brown, smooth branches. Leaf stalks are 10-15 cm long. Leaves are 30-40 cm long, compound with 5-11 opposite leaflets. Leaflets are stalked, ovate-oblong to elliptic-oblong, 7-12 cm long, 4-5 cm wide, papery. Leaf base is wedge- shaped to rounded, often oblique, margin toothed or entire, with a tapering tip. Tiny flowers are borne in panicles at the end of branches, 25-35 cm long. Flowers are stalkless, white. Fruit is ellipsoid to elliptic-ovoid, yellowish orange at maturity. Inner part of endocarp is woody and grooved, outer part is fibrous. Mature fruit is usually with 2 or 3 seeds. Flowering: March-April. Wild mango or Amara is mentioned in Ayurveda and traditional medicines such as Anorexia and nausea. Its leaves are applied in earache and barks are used in irregular menstruation in female. The ripened fruit is consumed as good diet and the unripe fruit is used as vegetable and the pickles etc.</p> |                                          |                        |
