Indian Heynea

Heynea trijuga Roxb. ex Sims.

F-Mliaceae

Medium size deciduous tree, bark is dark brown and rough. Leaves are compound and opposite, Leaflets are ovate with entire margin, and oblique base. Fruits are grown on tip of the branches in cluster with single seeds, White flowers are emerged on apical portion of the branch. Wood is used for fuel and agriculture implements. Widely planted for ornamental purpose. Locally known as "Ankho ka Tara" because ripen fruits look like open eyes.
