Zig zag Bamboo

***Dinochloa maclandii* (Munro) Kurz**

F- Poaceae

Dinochloa maclandii is perennial grass native to tropical and sub-tropical regions of Asia, Africa and Australia. It has zig zag shaped stem so it’s also known as Zig zag bamboo. It grows up to 15-20 meters height.. This bamboo is cultivated easily by vegetative cultivation. It’s very helpful for controlling soil erosion. This is one of the important plant for livelihood for their boundary making and to support the plants in agriculture field.
