Thuja

Thuja occidentalis L.

F-Cupressaceae

Distributed in North America and East Asia. In India Arunachal Pradesh and Western Himalaya, Assam and Uttarakhand. Evergreen tree planted for its ornamental foliage. Locally known as Morpankhi. Leaves are use in cut flowers for making bouquet and other decorative purposes. It is commercially used for rustic, fencing and posts. Essential oil also extracted from this species and used for cleaner and disinfectants. Propagated trough seeds and cuttings.
