Red silk Cotton Tree

Bombax ceiba L.

F-Bombaceae

Large deciduous tree commonly known as cotton tree. Straight tall tree with ashy bark and conical prickles on trunk in initial period. The leaves are palmate with about leaflets. Radiating from central point. Cup shaped red flowers sometimes yellow or white bloom when the tree is leafless. The fruits are woody capsule filled with white flosses with seeds. The Semal cotton is good for stuffing cushion specially pillow, mattress, and quilt. Soft wood is used for making fruit box and match sticks. Fast growing species easily propagated through seeds.
