Wood Apple

Aegle marmelos (L.) Correa

F- Rutaceae

Aegle marmelos, commonly known as bel, golden apple wood apple, a medium size thorny deciduous tree. It is native to the Indian Sub-continent, in India commonly found in Indo-Gangetic plain, Sub-Himalayan and dry deciduous forest. The tree is considered to be sacred by Hindus specially for Lord Shiva. Leaves are compound with three leaflets, central one being the largest. Fruits pulps are edible used for making juice and belapana. The leaves, bark, roots, fruits and seeds are used in tradition medicine. Bel patra is sacred to Hindus.
