Black Murdah

***Terminalia eliptica* Willd.**

F-Combretaceae

Large deciduous tree with clear bole. Bark is dark grey with deep vertical fissures. Leaves are simple, sub-opposite, oblong with entire margin, rounded base and acute apex. Inflorescence are spikes and flowers are white with five sepals and petals are absent. Fruits are woody five wings drupe. In matured tree bark looks like crocodile's skin, so it's called Crocodile Bark.
