***Holoptelea integrifolia* (Roxb.) Planch.**

F- Ulmaceae

Large deciduous tree with light grey bark. Leaves are alternately arranged, elliptic- ovate in shape with pointed tip. Small greenish flowers born in short racemes at the scars of fallen leaves in cluster. Fruits are circular net- veined wings and flat single seeds. Wood is good for furniture. Its flower, leaves and bark have medicinal values. It is used in Ayurvedic system for treatment of diabetes, skin diseases, and wound intestinal disorder etc. It is used for making light furniture and fuel wood. It is also used in plantation forestry due to tolerance and regeneration abilities.
