Remarks_	त्वचा रोगों के लिए बीज से तेल प्राप्त होता है (Seed oil for skin diseases)
Latitude	23.3585
Longitude	85.2459
Plant_Orig	Native

Pongam Oil Tree

***Pongamia pinnata* (L.) Pierre**

F- Papilionacea

Medium size deciduous tree with smooth grey bark commonly known as Indian beech tree and pongam oil tree. Leaves are imparipinnate with short stalked. Pinkish or white colour pea shaped flower appears in the tips of the twigs in cluster. Fruits are woody flat oval shaped contains single seed. Seeds are widely used for oil purposes called “ karanj oil”. Twigs are mostly used by rural peoples as a tooth brush. All parts of the tree are used for medicinal purposes. After extraction of oil byproduct like karanj cake is used as an insecticide in agriculture field to control insect and pest. Karanj oil is heavily demanded in festival of Deepawali for lightning the lamp (Diya).
