

S_No_	76
Vernacular	चालता (Elephant Apple)
Scientific	Dillenia indica
Family	Dilleniaceae
Remarks_	चटनी और करी के लिए फल का उपयोग (Fruit for chutney and curry)
Latitude	23.3574
Longitude	85.2472
Plant_Orig	Native

Elephant Apple

Dillenia indica L.

F-Dilleniaceae

Dillenia indica commonly known as elephant apple or chalta. Evergreen tree with brown bark peeling off a papery scale. The long broad leaves grow at the end of the branch, are toothed at the margins, and have parallel lateral veins giving them a unique shape. The flower is 15-20 cm in diameter with five white petals ovary crowned with 18-20 pale flattened stigmas. Fruits are used for making vegetables, chutney, and pickles. Widely used in Ayurveda and Sidha, bark and leaves are used as both astringent and laxative, and fruit juice is used in cough mixture and beverage.
