| Large deciduous tree with greyish bark. The leaves are palmately ribbed and have stipular, the leaves shape can range from oblong, broadly obovate to ovate. The upper side of the leaves is silver to rust colour. The fruit is an oblong woody capsule with five equidistant lines. The seeds are winged. Leaves are used for bowl and plate; flowers are used as a medicine and wood is good for timber. Plant is widely grown for ornamental purposed for fragrance of flower. Its flower looks like peeled bananas. |                                            |                  |
