River Red Gum

Eucalyptus camaldulensis Dehnh.

F-Myrtaceae

Eucalyptus camaldulensis, commonly known as the river red gum tree or Safeda. Tall evergreen tree with grew papery bark which peels of showing smooth under bark. Sickle- shaped light green leaves taper at both ends with pointed tip. Flowers grow in cluster of creamy white colour. The fruit is a woody hemispherical capsule filled with tiny dark brown seed. It is widely grown for industrial purpose for paper and plywood industry. Oil is a good medicinal value. In Jharkhand its plantation is banned.
