Longitude	85.2461
Plant_Orig	Native

Saptaparni

Alstonia scholaris (L.) R. Br. F-Apocynaceae

Alstonia scholaris commonly known as black board or devil's tree, it's an evergreen tree. Bark is grey in colour, flowers are small greenish white in cluster. Upper side of the leaves are glossy, while lower side is greyish, leaves occur in whorls of 4-7 that's why it's called Saptaparni. Fruits grow in cluster, long slim follicles, seeds are feathery but unable to disperse easily. Wood is used for plywood, curving, and moulding to make light furniture. Tree is very huge in size so its called devil tree.
