Indian Kino Tree

Pterocarpus marsupium Roxb.

F-Fabaceae

Pterocarpus marsupium is medium to large deciduous tree. Bark is greyish rough and flakes off in irregular scales. Leaves are shiny compound with alternate arrangements. Leaflets are oblong-linear in shape with entire margin. Flowers are yellow with five petals grown in cluster; Fruits are almost circular flat with an elevated centre single seed. It is mostly planted for its heavy and strong wood. It is used for doors, windows, furniture, etc. Easily propagated through seeds.
