Plant_Orig	Native

Teak	<i>Tectona grandis L.</i>	F- Verbinaceae
A large deciduous tree having fissured bark of brown colour, peeling off in thin flakes. Large leaves in opposite pairs have a very rough upper surface. A small fragrant white flower arrangement in dense cluster at the end of the branches. A spherical shape seed appears in the tip of the branch with cover with papery coated. Its wood is used for construction, furniture, carving, turning, doors and windows. World-famous wood due to its durability and resistance to termites. Due to high tensile strength, tight grain, and unique knot make it attractive for indoor and outdoor furniture and other items. It is also used for medicinal purposes. In India, it is naturally found in Andhra Pradesh, Madhya Pradesh, Maharashtra, Orissa, Karnataka, Kerala, Uttar Pradesh and Rajasthan.
