Manilkara zapota (L.) P. Royen

F-Sapotaceae

Manilkara zapota is commonly known as Chicoo. It is an evergreen tree native to Southern Mexico and Central America. The fruit is edible and Chicle extract from the bark is used to make chewing gum. It is an important commercial fruit. Its plant is grown by grafting with *Manilkara hexandra* (Khirni) root stock. It is widely planted for its tasty fruits.
