Malabar Neem

Melia dubia Cav.

F-Meliaceae

Melia dubia is a medium-sized deciduous tree with dark brown, rough, and lenticulate bark. Leaves are compound, Leaflets are ovate with crenate margin oblique Base and acuminate apex. Flowers are greenish with five petals grown on the tips of the branches. Fruits are dorsally compressed with longitudinal ridges initially green and turn yellow when ripe. It's mainly grown for its light wood used for making plywood, Packing, agriculture instruments, boxes, etc.
