Rudraksh

***Elaeocarpus ganitrus.* Roxb.**

F- Elaeocarpaceae

Out of three hundred species of Elaeocarpus, 35 are found in India. *Elaeocarpus ganitrus* is a important species of India. The bark of this species is reddish brown in colour, leaves are dark green and shiny, flowers are cream to white in colour produced in panicle. After 3-4 year of planting, it starts bearing fruits. These fruits are commonly called Rudraksh. It is also known as Amritphala. When the fruits are ripened, the stones are cover with a blue outer fleshy husk of the fruits. These stones serve as prayer beads for Hindus and Budhhists. It is associated with the Hindu deity Shiva.
