

S_No_	9
Vernacular	इंडियन मलबेरी (Indian Mulberry)
Scientific	Morinda citrifolia
Family	Rubiaceae
Remarks_	फल फुटबॉल जैसा जड़ों से पीला रंग प्राप्त होता है (Fruits look like football roots used for yellow dye)
Latitude	23.3579
Longitude	85.2441
Plant_Orig	Native

Indian Mulbary Tree

Morinda citrifolia L.

F-Rubiaceae

Morinda citrifolia is a shrub or a medium size tree that grows well in sandy and rocky soils. It grows up to 9 m tall, has simple, dark green and deeply veined leaves. The plant flowers and fruits all the year around. The flowers are small and white. The fruit is a multiple fruit that has a pungent odour when ripening, and is hence also known as cheese fruit or even vomit fruit. Scientific studies have investigated noni's effect on the growth of cancerous tissue. One such study found that noni inhibited and reduced growth of the capillary vessels sprouting from human breast tumour explants and, at increased concentrations, the noni caused existing vessels in tumours to rapidly degenerate.
