Caribbean Trumpet tree

Tabebuia acirea
(SilvaManco) Benth. & Hook f. ex S. Moor

F-Bignoniacea

It is small dry deciduous tree of family Bignoniaceae. It is native to South America in Suriname, Brazil, Peru, Paraguay, and Northern Argentina. The common name is Caribbean trumpet tree and known as silver trumpet tree and tree of Gold. Flowers are bright yellow trumpet in cluster. Growing widely for ornamental purpose and wood is used for making furniture. The leaves are compound with five to seven leaflets. Light green with Silvery scale leave on both sides. Spectacular flower display on leafless shoot at the end of the dry season.
