Kala Kendu
Medium sized evergreen tree always found near water sources like river and streams. Bark is dark brown and leaves are long and shiny. Young leaves are red turned green after maturity. Male and female white flowers grow on different plants. Native to Indian Subcontinents and South East Asia. Ball shaped fruit turn reddish when matured. Wood is used for making cabinet and leaves are used for rolling be eddies.

Diospyros malabarica (Desr.) Kostel.
